JOURNAL OF TOXICOLOGY AND ENVIRONMENTAL HEALTH
PART A
Volume 61 Tables of Contents

Volume 61, Issue 1

Preface 1
D. K. Bhalla

Oxidative Effects and Inflammatory Responses in the Lung 3
D. K. Bhalla

Regulation of Leukocyte Function by Nitric Oxide Donors: The Effect of *S*-Nitroso-Thiol Complexes 9
T. L. Gluckman, J. E. Grossman, J. D. Folts, and K. T. Kruse-Elliott

Airway Response to Concomitant Exposure with Endotoxin and Allergen in Atopic Asthmatics 27
Marlowe W. Eldridge and David B. Peden

Fewer T Lymphocytes and Decreased Pulmonary Influenza Virus Burden in Mice Exposed to 2,3,7,8-Tetrachlorodibenzo-*p*-Dioxin (TCDD) 39
B. Paige Lawrence, Travis K. Warren, and Halle Luong

The Fungal Cell Wall Component β-1,3-Glucan Has an Adjuvant Effect on the Allergic Response to Ovalbumin in Mice 55
Heidi Ormstad, Else-Carin Groeng, Martinus Løvik, and Geir Hetland

Oxidative Mechanisms in Tobacco Smoke-Induced Emphysema 69
JeanClare Seagrave

Volume 61, Issue 2

Subchronic and Developmental Toxicity Studies of *n*-Butyl Propionate Vapor in Rats 79
M. I. Banton, T. R. Tyler, C. E. Ulrich, M. D. Nemec, and R. H. Garman

Two-Generation Reproduction Study by Dosing with Glutaraldehyde in the Drinking Water of CD Rats 107
Teresa L. Neeper-Bradley and Bryan Ballantyne

Pharmacokinetic Disposition and Tissue Distribution of Bisphenol A in Rats After Intravenous Administration 131
Sun Dong Yoo, Beom Soo Shin, Seung Jun Kwack, Byung Mu Lee, Kui Lea Park, Soon-Young Han, and Hyung Sik Kim

Contaminated Department of Energy Facilities and Ecosystems: Weighing the Ecological Risks 141
Joanna Burger

Volume 61, Issue 3

Microcystins (Cyanobacterial Toxins) in Drinking Water Enhance the Growth of Aberrant Crypt Foci in the Mouse Colon 155
Andrew R. Humpage, Stephen J. Hardy, Emma J. Moore, Suzanne M. Froscio, and Ian R. Falconer

Evaluation of Oxidative Stress in Experimental Colitis: Effects of L-Arginine–Nitric Oxide Pathway Manipulation 167
Arzu Seven, Oktay Seymen, Figen İnci, Büge Öz, Günnur Yiğit, and Gülden Burçak

Ultraviolet Radiation and Reactive Oxygen Generation as Inducers of Keratinocyte Apoptosis: Protective Role of Tea Polyphenols 177
Yi-Cai Fu, Xi-Peng Jin, Shao-Min Wei, Hui-Feng Lin, and Sam Kacew

In Vitro Penetration of Soil-Aged Mercury Through Pig Skin 189
Gloria A. Skowronski, Rita M. Turkall, and Mohamed S. Abdel-Rahman

Stimulation of MCF-7 Cell Proliferation by Low Concentrations of Chinese Domestic Polychlorinated Biphenyls 201
Kejiu Du, Shaogang Chu, and Xiaobai Xu

Physiologically Based Modeling of the Maximal Effect of Metabolic Interactions on the Kinetics of Components of Complex Chemical Mixtures 209
Sami Haddad, Ginette Charest-Tardif, and Kannan Krishnan

Volume 61, Issue 4

Evaluation of the Health Risk Associated with Exposure to Chloroform in Indoor Swimming Pools 225
Benoît Lévesque, Pierre Ayotte, Robert Tardif, Ginette Charest-Tardif, Éric Dewailly, Denis Prud'Homme, Guy Gingras, Sylvain Allaire, and Robert Lavoie

Effects of Indoor Environmental Factors on Risk for Atopic Eczema in a Subtropical Area 245
Chun-Yuh Yang, Ming-Fen Cheng, and Ya-Lun Hsieh

Concentrations of Arsenic, Cadmium, Copper, Lead, Mercury, and Zinc in Human Placentas from Two Cities in Ukraine 255
Tamara D. Zadorozhnaja, Ruth E. Little, Richard K. Miller, Nikola A. Mendel, Robert J. Taylor, Bobby J. Presley, and Beth C. Gladen

Recreation and Risk Around Los Alamos: Are Hispanics More at Risk? 265
Joanna Burger

Microcystin-LR Decreases Hepatic and Renal Perfusion, and Causes Circulatory Shock, Severe Hypoglycemia, and Terminal Hyperkalemia in Intravascularly Dosed Swine 281
Val R. Beasley, Randall A. Lovell, Kenneth R. Holmes, Horace E. Walcott, David J. Schaeffer, Walter E. Hoffmann, and Wayne W. Carmichael

Volume 61, Issues 5–6
Preface 305

Part I—Benzene State-of-the-Science Workshop

Assessing the Health Risks of Benzene: A Report on the Benzene State-of-the-Science Workshop 307
D. Krewski, R. Snyder, P. Beatty, G. Granville, B. Meek, and B. Sonawane

Overview of the Benzene Problem

Overview of the Toxicology of Benzene 339
Robert Snyder

Benzene Metabolism and Genotoxicity

Benzene-Induced Genotoxicity 347
John Whysner

Benzene-Induced Genotoxicity: A Different Perspective 353
David A. Eastmond

The Role of Metabolism and Specific Metabolites in Benzene-Induced Toxicity: Evidence and Issues 357
David Ross

Needs for Research on Benzene Metabolism and Dosimetry 373
Paul M. Schlosser

Benzene Toxicity and Leukemogenesis

Benzene Leukemogenesis: An Environmental Carcinogen-Induced Tissue-Specific Model of Neoplasia Using Genetically Altered Mouse Models 377
John Edgar French and Muriel Saulnier

Myeloid Leukemia After Cytotoxic Therapy and Other Hematotoxins 381
Richard A. Larson

Myelodysplastic Syndromes May Have an Infectious Etiology 387
Azra Raza

Molecular Models of Benzene Leukemogenesis 391
Richard D. Irons

Utility of a Mouse Model for Studying the Effects of Benzene on the Myeloid Lineage: Effects of Hydroquinone on a Model Myeloid System 399
George F. Kalf

Nitric Oxide as a Mediator of Benzene-Induced Hematosuppression and Toxicity 413
Debra L. Laskin, Diane E. Heck, Chitra J. Punjabi, and Jeffrey D. Laskin

Benzene-Induced Leukemia

Benzene and Lymphohematopoietic Malignancies in China 419
Richard B. Hayes, Songnian Yin, Nathaniel Rothman, Mustafa Dosemeci, Guilan Li, Lois T. Travis, Martyn T. Smith, and Martha S. Linet

Petroleum Worker Studies and Benzene Risk Assessment 433
Robert Schnatter

Biomarkers in the Molecular Epidemiology of Benzene-Exposed Workers 439
Martyn T. Smith and Nathaniel Rothman

The Health Effects Institute's Biomarker Research in China 447
Martha E. Richmond

Recent Findings and New Initiatives for Epidemiologic Research on Benzene 457
Otto Wong

Volume 61, Issues 5–6 (*Continued*)

Issues for Discussion: Benzene-Induced Leukemia—Human Studies 467
David Bayliss and Babasaheb Sonawane

Future Research to Improve Risk Assessment and Management

Carcinogenic Effects of Benzene—A Status Update and Research Needs to Improve Risk Assessment: U.S. EPA Perspective 471
Babasaheb Sonawane, David Bayliss, Lawrence Valcovic, Chao Chen, Bruce Rodan, and William Farland

Benzene Status of Assessment—Priority Substances Program 473
M. E. (Bette) Meek

California Perspective on the Assessment of Benzene Toxicological Risks 479
Lauren Zeise and Thomas A. McDonald

Summary of Research Published After the Workshop

Recent Developments in Benzene Risk Assessment 485
Sam Kacew and Irma Lemaire

Part II—Hematotoxicity Modeling Workshop

Introduction to the Hematotoxicity Modeling Workshop 499
D. Krewski and C. Henry

A Biomathematical Model of Cyclophosphamide Hematotoxicity 501
Louis Anthony Cox, Jr.

Comments on the Cox Model of Cyclophosphamide Hematotoxicity 511
Kannan Krishnan

From Cyclophosphamide Hematotoxicity to Modeling Cancer 515
E. Georg Luebeck

Review of the Cox Model 521
Chao Chen

Comments on a Biochemical Model of Cyclophosphamide Hematotoxicity 525
Christopher J. Portier and Frederick M. Parham

A Clinician's Comments on the Cyclophosphamide Hematotoxicity Biologically Based Risk Assessment Model 529
Harold L. Atkins

Review of the Cox Hematotoxicity Model 539
Mark L. Heaney and Stephen D. Nimer

Biologically Based Risk Assessment Model for Cyclophosphamide Hematotoxicity in Animal Species: Concluding Comments 543
Melvin E. Andersen and Daniel Krewski

Volume 61, Issue 7

Individual Variability in the Zinc Inducibility of Metallothionein-II_A mRNA in Human Lymphocytes 553
Ming-Tsang Wu, Bruce Demple, Richard A. O. Bennett, David C. Christiani, Rong Fan, and Howard Hu

Protective Effects of Manganese Against Lipid Peroxidation 569
Min-Tzu Chen, Jenn-Yuan Sheu, and Te-Hsien Lin

Dermal and Systemic Toxicity After Application of Semisynthetic Metal-Working Fluids in B6C3F1 Mice 579
Nabil H. Al-Humadi, Anna A. Shvedova, Lori Battelli, Nicole Diotte, Vincent Castranova, and Choudari Kommineni

Morphological and Pathological Effects of Cadmium Ingestion on Pekin Ducks Exposed to Saline 591
Maryanne R. Hughes, Judit E. Smits, John E. Elliott, and Darin C. Bennett

Effects of Ochratoxin A on Cytotoxicity and Cell Differentiation in Cultured Rat Embryonic Cells 609
Jin Tae Hong, Kui Lea Park, Soon Young Han, Ki Sook Park, Hyung Sik Kim, Se Dong Oh, Rhee Da Lee, and Seung Jae Jang

Lung Responses to Hypothyroidism, Hyperthyroidism, and Lipopolysaccharide Challenge in Rats 623
L. J. Huffman, D. J. Judy, K. M. K. Rao, D. G. Frazer, and W. T. Goldsmith

Volume 61, Issue 8

Rapid Communication: *Caenorhabditis elegans* as an Alternative Animal Species 641
Phillip L. Williams, Gary L. Anderson, John L. Johnstone, Adrian D. Nunn, Michael F. Tweedle, and Paul Wedeking

Rapid Communication: PCB-Associated Alteration of Hepatic Steroid Metabolism in Harbor Seals (*Phoca vitulina*) 649
G. M. Troisi and C. F. Mason

Polychlorinated Biphenyls Are Selectively Neurotoxic in the Developing *Spisula solidissima* Embryo 657
Jill A. Kreiling, Raymond E. Stephens, Alan M. Kuzirian, Kathryn Jessen-Eller, and Carol L. Reinisch

Gender Differences in Developmental Immunotoxicity to Lead in the Chicken: Analysis Following a Single Early Low-Level Exposure In Ovo 677
T. L. Bunn, J. A. Marsh, and R. R. Dietert

Subchronic Effects Following a Single Sarin Exposure on Blood–Brain and Blood–Testes Barrier Permeability, Acetylcholinesterase, and Acetylcholine Receptors in the Central Nervous System of Rat: A Dose-Response Study 695
Katherine H. Jones, Anjelika M. Dechkovskaia, Elizabeth A. Herrick, Ali A. Abdel-Rahman, Wasiuddin A. Khan, and Mohamed B. Abou-Donia

Metabolism of Styrene Oxide to Styrene Glycol in Enriched Mouse Clara-Cell Preparations 709
Gary P. Carlson
